

Big Assignment:

1. Write a C/C++ program to take an input, e.g `int a = b + 1c;` and identify the tokens (valid token with typename, and invalid tokens).
2. Similar program : but use a file (file read and file write)

Input: **`int a = b + c1`**

int	Keyword
a	Identifier
=	Operator
b	Identifier
+	Operator
1c	Invalid identifier
